

# AX Healthcare

## Manage Better

- Improve visibility into operations
- Utilize skilled staff more efficiently
- Reduce administrative overhead
- Optimize your supply chain

AX Healthcare delivers impressive tools to help your staff find, use and share information; provide better patient care; and manage your financial operations effectively.

A dedicated solution for healthcare that integrates Microsoft Dynamics AX Financials, Human Resources, and Global Payroll AX modules with *StaffRight*® scheduling provides direct access to personnel, payroll, benefits, time and attendance, scheduling, general ledger, and all other financial and planning information.

Built on Microsoft Dynamics AX 2009, the solution works like and with other Microsoft products that many people are familiar with. This helps reduce training time. The Microsoft Dynamics AX user interface is based on Microsoft Office Outlook standards and is familiar and easy to use.

### ***Benefit from an integrated solution***

- Real time, role based views
- Saves time
- Improve accuracy
- Lower costs
- Make better decisions

# AX Healthcare

## *a solution built on Microsoft Dynamics AX2009*

### Financials

- Complete financial module including GL, AP, AR, Project Accounting and Fixed Assets
- Specialized role centers present relevant tasks and information in a personalized view
- Fully supports Canadian tax regulations and requirements
- Sophisticated cost accounting and multi-dimensional financial reporting
- Integrated bank settlement reconciliation

### Human Resources

- Track core employee information including positions, skills, certifications, and absences
- Administer recruiting programs and capitalize on Microsoft Outlook integration
- Manage professional development including reviews and competency mapping
- Administer training courses by target group, instructor, course identification and more
- Conduct online survey and analysis with the questionnaire tool

### Technology

- Fully scalable 3-tier architecture supports thousands of concurrent users
- Created using next-generation Microsoft object-oriented integrated development environment
- Easy to customize and upgrade
- Custom workflow engine for approval processes
- Fully leverages the Microsoft Server and Microsoft Office platforms
- Enterprise web portal can exchange information with all functional areas enabling employees, vendors, and partners to have appropriate access

### Payroll

- Global Payroll AX is a sophisticated payroll solution with flexible user-definable rules
- Fully effective-dated to provide a historical view of all information and the ability to enter future-dated changes
- Supports multiple positions for the same employee
- Flexible processing enables retro-active, future-dated and mid-pay period changes
- User-definable calculations provide a rules engine for automating compliance with complex labor contracts
- Custom benefit deduction management including unique benefit packages for groups of employees, user-definable calculations and interface with AP for vendor submissions
- Leave entitlement management with flexible accrual methods including options for negative or overflow accounts
- Full integration with accounts payable, general ledger, human resources, scheduling, time and attendance.

### Materials Management

- Materials Management in AX Healthcare provides you the essential processes you need for requisitions, procurement, fulfillment and consumption.
- Improve the accuracy of your demand planning and of your overall supply chain.
- Automate purchasing and requisitions processes enabling you to gain efficiencies and assurance that these important functions are being handled.
- Streamline par-level management and integrations to handhelds and labeling bringing you a better sense of the location, age and stock levels of your inventory
- Improved inventory tracking, so you can minimize waste by prioritizing consumption of older materials first

# StaffRight®

## A key component of the AX Healthcare solution

- Optimize Staff Schedules and Improve Patient Care**

Enhanced workforce scheduling flexibility and control across the entire healthcare organization ensures that individuals with the right skills are in the right place to meet critical needs.

- Reduce Costs and Administration Burden**

The automation and seamless integration of employee scheduling and payroll processes reduces administrative burden, minimizes operational costs, and ensures adherence to legal rules and union policies.

- Increase Employee Satisfaction and Retention**

Shift schedules that reflect employee preferences, combined with web-based employee self-service tools allow healthcare organizations to increase job satisfaction levels and improve employee retention rates.

- Enhance Decision Making**

Powerful tools for trend analysis and real-time reports allow healthcare organizations to respond quickly to human resource and labor situations and even avoid them through

StaffRight® AX is fully integrated with Microsoft Dynamics AX to provide workforce management capabilities – employee scheduling, time and attendance, and business analysis – to this ERP solution. Healthcare organizations now have access to an end-to-end solution that simplifies time entry, accurately applies work rules to earnings calculations, and increases efficiency through optimal work schedules and employee self-scheduling.

StaffRight scheduling software helps healthcare organizations manage shift schedules for optimal efficiency, enhance job satisfaction and reduce turnover, and ultimately improve patient care and financial performance.

Labor is a major expense for healthcare organizations often accounting for 50% or more of the total operating budget. Our easy-to-use staff scheduling software automates many of the complex, time-consuming labor-related processes, allowing hospitals to proactively manage their workforce for optimal efficiency.

Loki Systems has been helping healthcare organizations save time scheduling and managing their staffing needs for over 10 years. Thousands of health care employees in over a hundred sites use StaffRight every day. StaffRight software interfaces to all major ERP and payroll systems.

## Key Benefits of AX Healthcare

---

### **Role based view on your entire organization**

Role Center prioritizes tasks and real-time information for a majority of business functions

More than 30 Role Centers tailored to organizational roles available. These provide a central workspace for users to start their work and organize their activities within the business application. The information displayed on a Role Center and interactive Web Parts like the work list simplify access to data in the business application, enabling greater productivity and access to data for decision making.

---

### **Real-time views of critical data**

Administer customer, item, and employee information from a central location, and help improve real-time visibility into activities with business intelligence that can analyze critical data from multiple perspectives to improve your operational efficiency.

---

### **Improved Utilization of skilled staff**

StaffRight's advanced workforce time and attendance software fully automates all time, attendance and payroll data preparation processes. StaffRight provides the ability to track attendance through time card and biometric interfaces, and to export hours directly into payroll. It monitors all staffing operations in compliance with work rules and budgets – rules that are specific to union contracts and determine pay premiums.

---

### **Streamlined supply chain processes**

Efficiently manage the organization by boosting operational efficiency throughout your supply chain with integrated processes, and help manage inventories, pricing, costs, and discounts better.

---

Pressures on the healthcare system increase every year. Patient demands, nursing shortages, and high costs require creative and reliable solutions. We've made workforce management solutions our business since 1995 and the AX Healthcare solution extends that offering with a tailored solution designed to specifically meet the demanding back office needs of Healthcare facilities. By utilizing the power of Microsoft Dynamics AX and backing it up with a dedicated technical support and service team, our clients enjoy an impressive return on investment.
