

## QUICKSTART IMPLEMENTATION

The QuickStart kit for Advanced Payroll is a standardized implementation project that contains all the configuration needed to fulfill basic payroll requirements. It can be used out-of-the-box or built upon for more sophisticated environments to greatly reduce the time to launch.

QuickStart is a database pre-configured with all the basic statutory deductions, reporting forms, and standard employee calculations. This allows QuickStart to fast-track your implementation project by allowing you to start to migrate employee data right immediately. It readily integrates Advanced Payroll with the General Ledger, Human Resources and Accounts Payable in Dynamics 365 for Operations.

### What QuickStart Can Do For Your Business:

- Simplify the Advanced Payroll implementation
- Produce a final configuration in a matter of days
- Allow you to start running payroll sooner
- Shorten your project timeline to save you time and money

### QuickStart has localizations available for Canada, Australia and the United Kingdom

The **QuickStart basic kit** comes with:

- Multiple overtime rates, standard pay cycles, basic vacation and sick leaves and more

The Canadian kit includes:

- **Basic kit** + CPP and EI deductions, T4s, RL1s and more

The Australian kit includes:

- **Basic kit** + Payroll Tax and Superannuation contributions, ETP, PAYG summaries, TFN declarations and more

The UK kit includes:

- **Basic kit** + PAYE and NI deductions, FPS, statutory payments (SMP, SAP, SSP, etc.) and more

With QuickStart, businesses with standard payroll requirements can gain all the power of the Advanced Payroll calculation engine with a faster, cost-effective implementation.
